CLASSIC-LEATHER

ST1000 **ECOPIEL**

COMPOSITION

Microperforated vegetable tanned peccary leather

SIZES

From 35 to 50 size by size

CARACTERISTICS

Flat and thin sole

ST1010 **ERGOPIEL**

COMPOSITION

Vegetable tanned microperforated peccary leather
Latex with activated carbon

SIZES

From 35 to 50 size by size

CARACTERISTIQUES

Flat and thin sole

ST1015 **LUXOPIEL**

COMPOSITION

Vegetable-tanned luxury basane leather
Latex with activated carbon

TAILLES

From 35 to 50 size by size

CARACTERISTIQUES

Flat and thin sole

ST1020 **ANATOPIEL**

COMPOSITION

Vegetable-tanned luxury basane leather
Latex with activated carbon
Foot arch support
Absorbing insert of shocks in the heel

SIZES

From 35 to 50 size by size

CARACTERISTIQUES

Orthopedic insole
Cushioning in the heel

COMFORT-ANTIFATIGUE

ST1150 **MEMORY** ●

COMPOSITION

Absorbent textile
Memory foam shape

SIZES

Double size 34/35 to 46/47

CARACTERISTICS

Cushioning on the entire surface of the sole

ST1040 **SUPERGEL** ● ✂

COMPOSITION

Absorbent microfiber
Anatomically shaped gel

SIZES

Double size 34/35 to 46/47

CARACTERISTICS

Cushioning on the entire surface of the sole

ST1035 **DYNATEC PLUS** ●

COMPOSITION

Absorbent microfiber
Thermoformed polyurethane foam
Insert latex with activated carbon
Insert absorber of high-density shock

SIZES

Double size 34/35 to 46/47

CARACTERISTICS

Cushioning front and back
Antistatic sole

SOLES

HYGIENE

ST1125 **CARBOTEC**

COMPOSITION

Microperforated absorbent yarn fabric
Microperforated latex with activated carbon

SIZES

from 35 to 50 size by size

CARACTERISTICS

Absorbs moisture

ST1100 **BASEPROTEC**

COMPOSITION

Microperforated non-woven fabric
Latex with activated carbon

SIZES

from 35 to 50 size by size

CARACTERISTICS

SANITIZED anti-bacteria and anti-odour treatment
Absorbs moisture

ST1108 **FELPA PROTEC**

COMPOSITION

Absorbent and resistant isothermic felt
Latex with activated carbon

SIZES

from 35 to 50 size by size

CARACTERISTICS

SMELTEC anti-bacteria, anti-odours and anti-fungal treatment
Absorbs moisture

ST1109 **PRIM**

COMPOSITION

Resistant yarn fabric
Latex with anti-bacteria and anti-odours treatment
Sanitized

SIZES

Double sizes from 35 to 48

CARACTERISTICS

Hygienic comfort sole
basic with Sanitized treatment

ST1105 **ABSOTRIM**

COMPOSITION

Absorbent and resistant felt
Latex with activated carbon

SIZES

Trim to size (from 35 to 46)

CARACTERISTIQUES

Absorbs moisture

ST1110 **RESPIPROTEC**

COMPOSITION

Microperforated non-woven fabric
Latex with activated carbon

SIZES

from 35 to 50 size by size

CARACTERISTIQUES

SMELTEC anti-bacteria, anti-odours
and anti-fungal treatment
Absorbs moisture

ST1120 **MAXIPROTEC**

COMPOSITION

Non-woven fabric
Honeycombed latex with activated carbon

SIZES

from 35 to 50 size by size

CARACTERISTIQUES

SMELTEC anti-bacteria, anti-odours
and anti-fungal treatment
Absorbs moisture

ST1107 **ABSOTRIM PROTEC**

COMPOSITION

Absorbent and resistant felt
Latex with activated carbon

SIZES

Trim to size (from 35 to 46)

CARACTERISTIQUES

SMELTEC anti-bacteria, anti-odours
and anti-fungal treatment
Absorbs moisture

THERMAL

ST1127 FRESH PROTEC

COMPOSITION

Cotton curly
SANITIZED treated latex

SIZES

from 35 to 50 size by size

CARACTERISTIQUES

SMELTEC anti-bacteria, anti-odours
and anti-fungal treatment
Absorbs moisture
Edged soles

ST1025 AIR PLUS

COMPOSITION

Three-dimensional textile
Activated carbon latex
Pure activated carbon particles (15%)

SIZES

from 35 to 50 size by size

CARACTERISTICS

Ventilates the foot through air circulation
Massaging effect
Edged soles

ST1190 BORALU

COMPOSITION

100% natural fleece wool
Isothermal foam
Refractory aluminum foil

SIZES

from 35 to 50 size by size

CARACTERISTICS

Good isolation against the cold

ST1180 POLARTEC

COMPOSITION

Isothermal and heating microfiber
Latex with activated carbon

SIZES

from 35 to 50 size by size

CARACTERISTICS

Good isolation against the cold

TECHNICAL

ST1160 **UNIVERSAL**

COMPOSITION

Resistant fabric
Anatomical polyethylene foam

SIZES

from 35 to 48 in double size

CARACTERISTICS

Antistatic sole

ST1165 **ESD**

COMPOSITION

Thermoformed polyethylene

TAILLES

from 35 to 48 size by size

CARACTERISTICS

ESD sole (resistance between 0.75 and 35
Mega Ohms)

ST1170 **ASFALTEC**

COMPOSITION

Luxury basane leather vegetally tanned
Insulating ceramic fiber against heat
Cellulose

SIZES

from 35 to 50 size by size

CARACTERISTICS

Sole that limits the rise in temperature
for 20 minutes on a 300° floor

COMFORT

ST9000 **ALGO** ○

ST9001 **ALGO** ●

COMPOSITION

80% cotton
20% polyamide

SIZES

CARACTERISTICS

"Y" stitched heel
Tip, sole and curly heel reinforcements
Good isolation against the cold

TECHNICAL

ST9150 **STRONG** ●

COMPOSITION

40% wool
39% Rhovyl-wool
20% polyamide
1% elastane

SIZES

35-38 (S) / 39-42 (M) / 43-46 (L) / 47-50 (XL)

CARACTERISTICS

"Y" stitched heel
Curly reinforcements all over the sock
Non-flammable
Good isolation against the cold
Evacuates moisture

SPECIAL BOOTS

ST1115 **SEMELLE FELPA**

COMPOSITION

Absorbent and resistant felt
Activated carbon latex foam

SIZES

from 35 to 50 size by size

CHARACTERISTICS

Absorbs moisture

ST9050 **SURCHAUSSETTE FORRO**

COMPOSITION

Acrylic fur

SIZES

One size fits all (from 35 to 46)

CHARACTERISTICS

Isolates against the cold

ACCESSORIES

ST9009 **TRISOX**

Visiting and/or test disposable socks

Composition:

Nylon flesh color

SIZES:

One size, up to a 43 approx.
144 units per box

AK369 **SANITIZING SPRAY AKILEINE 150ml**

Desinfects and desodorizes footwear
Long lasting effectiveness

THE TECHNOLOGIES

Sanitized is a fabric treatment process. It prevents the formation of odours when the body meets the fabric. It fights bacteria and odours and offers a long-lasting hygienic freshness.

Composition of the treatment

The Sanitized treatment requires the use of a wide range of chemical products, of which there are currently over 150. These chemical products are harmless to humans and to the environment. They resist repeated washing of the fabrics to maintain good hygiene.

Launched in 1997, Rhovyl'As® antibacterial is an innovative fiber containing an antibacterial substance. This bacteriostatic agent integrated in the heart of the fiber prevents the development of bacteria that are born during any activity of the body.

UN PAS DE PLUS DANS LE CONFORT ET L'HYGIÈNE

- A durable antibacterial effectiveness which does not disappear with the washings (this effectiveness was proven until 100 washings by *l' Institut Pasteur*)
- An improved hygiene that brings comfort and freshness, reinforced by thermoregulation and moisture transfer properties that leave the skin healthy and dry.
 - Thermal isolation
 - Moisture transfer
 - Non-flammability
 - Resistance to chemicals

PROPERTIES

The performances of Rhovy® fiber (thermal isolation, moisture transfer, non-flammability, atmospheric, biological, and chemical resistance) combined with those of wool guarantee a perfect isolation from the cold.

Rhovyl'Laine® combines warmth with softness and ensures dry skin in all circumstances.

Moreover, products made from this non-flammable fiber: are machine washable, dry quickly out and do not require ironing.

ADVANSA's Coolmax®, a high-performance fabric, helps improve the physical performance of athletes who wear it.

The Coolmax® fibre moves perspiration from the body to the outer layer of the fabric.

Its originality lies in the shape of its section which leads to a grooved fiber to better evacuate moisture from perspiration.

Hydrophobic, it retains 8 times less moisture than nylon and 14 times less than cotton.

It contributes to a better thermal regulation of the body.

This fiber is used in intensive sportswear, socks, clothing and shoe linings, etc...

The SMELTEC impregnation treatment is the result of collaboration between Easy Footcare and a laboratory that manufactures dermato-cosmetic products.

This solution makes it possible to ensure an excellent hygiene in the shoes and to avoid the development of mycoses.

The active microbicides with broad spectrum protect against the principal infectious problems of the skin and against the principal germs responsible for mycoses (*Aspergillus Niger*, *T. rubum*, *Candida Albicans*, *Staphylococcus Aureus*, *Aspergillus fumigatus*, *Tricophyton Mentagrophytes*).

Terms and Conditions of Sale

SMELTEC 2024

1.- Order:

The submission of an order by a buyer implies acceptance of these general conditions of sale.

The clauses appearing on the order of this purchaser and contrary to our general conditions of sale cannot be opposed to us.

The purchaser commits himself respecting the conditionings stipulated on the tariff and their multiples.

Our footwear items are sold from size 35 to 50 and packaged by 10 pairs size by size.

The products of maintenance are sold by boxes of 24 units.

2.- Prices :

Our prices are exclusive of VAT

Our prices are indicated EXWORKS (ex-factory)

Franco CEE: 1500 € excluding taxes.

No minimum order, shipping costs will be charged to the customer below the CEE shipping.

Our invoices are established in euros

3.- Delivery :

The normal shipping time is 10 working days upon receipt of the order (on stock).

Please consult us for volumes over 2000 pairs.

Delivery times are given to the buyer as an indication only, they start to run from the date when our services are in possession of all the documents necessary for the execution of the order.

A delay in delivery shall not be considered as a reason for breach of contract of sale nor shall it give rise to payment of damages or penalties for delay. The seller reserves the right to make split deliveries.

Buyer must verify shipments upon arrival. If the goods have been damaged during transport, the buyer will make all necessary reserves and claims against the carrier.

The buyer must confirm these reserves to the carrier by registered letter within 3 days of receiving the goods.

In the case of modifications of the purchaser's situation (change of structure, default or delay in payment, bankruptcy, dissolution, death), we reserve the right to suspend deliveries, to demand guarantees or, failing that, to cancel the orders.

No goods may be returned without our consent. The shipping costs are at the buyer's expense.

4.- Payment :

All our invoices are payable at our head office: Carrer Gaspar Fabregas i Roses, 61 - 08950 Esplugues de Llobregat (Spain).

Payment within 60 days of the date of invoice (article L441-6 of the commercial code modified by the law "LME" from 04/08/2008)

Payment within 10 days of the date of invoice, amount credited to our bank account CIC Est: discount 1,5%

Payment in advance: discount 2%.

Payment dates must be respected by the buyer, even if transport or delivery is delayed for reasons beyond the control of the seller.

5.- Interests :

If the payment is not resolved by the due date, the seller reserves the right to claim interest in an amount equal to 3 times the legal interest rate in force at the date of the invoice.

6.- Retention clause of ownership

The goods travel at the recipient's risk, even in the case of carriage paid by the seller.

The property of the delivered goods is reserved to us until the complete payment of the price, expenses and accessories.

By express agreement, we reserve the property of the goods until the last day of their complete payment.

7.- Jurisdiction Clause:

The parties shall endeavor to settle amicably any dispute arising from the current general conditions of sale.

If within a period of one month from the notification of one of the parties to the other of the existence of the dispute,

no amicable solution could be established between the parties, the dispute will be brought to the attention of the competent.

If any dispute is established between the parties, the dispute shall be referred to the competent courts of Barcelona (Spain).

Any order implies implicit acceptance of these terms and conditions.
